

## Assignment - 1

Ans to the question -1:

```
#include <stdio.h>

int main() {
    float bangla, english, math, chemistry, biology, total, percentage;

    // Input marks for each subject
    printf("Enter marks of Bangla: ");
    scanf("%f", &bangla);

    printf("Enter marks of English: ");
    scanf("%f", &english);

    printf("Enter marks of Math: ");
    scanf("%f", &math);

    printf("Enter marks of Chemistry: ");
    scanf("%f", &chemistry);

    printf("Enter marks of Biology: ");
    scanf("%f", &biology);

    total = bangla + english + math + chemistry + biology;
    percentage = (total / 500) * 100;

    // Display the result
    printf("\nYou got total %.2f out of 500.\n", total);
    printf("You got %.1f%% marks\n", percentage);
    return 0;
}
```
